We were notified in a letter on March 3, 2003 that our 486 application was under consideration. In a letter dated August 4, 2004 we were notified that we were approved for e-rate reimbursement for this application for July 1, 2003 through June 30, 2004.

In order to provide internet access in classrooms for the 2003-2004 school year, some of the equipment had to be purchased by July of 2003 so that it could be installed during the summer months around summer school and other activities. Summer is also when department staff can be made available for this type of project. Based on this and due to our inexperience with the e-rate process, we mistakenly ordered the equipment three weeks before the 486 start date.

Since we purchased the correct equipment for the approved usage and we purchased it from the correct vendor, we are wondering if the start date of the 486 can be waived for

this purchase? As you can also see the purchasing decision had to be made before the final approval letter was sent out. To receive the equipment in time, we ordered all of the equipment with local funds.

We would be glad to provide any other information that may help you to with the decision regarding this request for waiver.

Thank you for your attention in this matter.
